Introduction

06 January 2025 11:00

Syllabus Discussion

* Overview :-

1. History & Evolution
2. Cloud computing & Traditional Computing
3. Benefits & Challanges
4. Cloud computing vs Cluster Computing vs Grid computing

* Computing Architecture :-

1. Client/Server
2. Components
   - front-end
   - Back-end
   - middlware
3. Layers of Cloud Architecture
   - Iaas
   - Paas
   - Saas
4. Important Networking Technologies
5. Protocols used in Cloud computing
6. Web services in Cloud Computing
7. Deployment models
   - Public
   - Private
   - Hybrid
   - Community

* Virtualization

- → Different approaches
- → VMs
- → Strategies (EC2)

* Multi-Cloud management system

* Energy Efficiency in Clouds

* Cloud Securities
